

# LIGHTWOOD

Lightwood is a lightweight sandwich panel, consisting of:

- 1) stratified wood, multilayer or MDF skins
- 2) a center core made of glass wool, rock wool, wood fiber or sheep wool, that ensures a good heat and acoustic insulation but with a low specific weight.

This panel finds its ideal use in the realization of partition walls of any kind, both in the civil, industrial and commercial field.

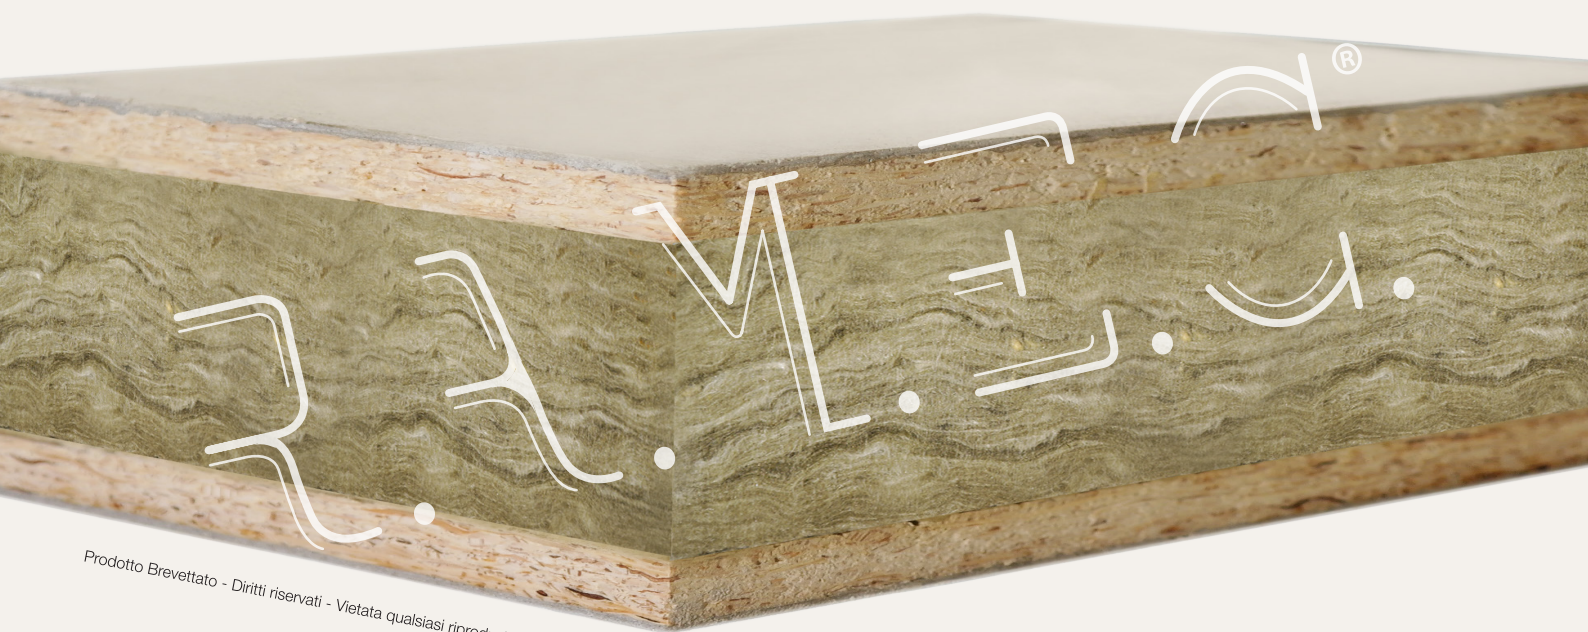

The glue used in the assembly process of the materials is

of our own invention, certified, solvent-free, with no VOC emissions and with technology that follows the nautical regulations.

The external finish of the skins, making up the panel, can be of various kinds such as laminates, wood finishes, paints or thin slabs of natural stone.

Depending on the thickness required by the designer it is also possible to equip the panel with approved raceways for the passage of cables and/or pipes.

The standard size of the panel is of 250 x122 cm.
