

# MULTILIGHT PANEL

Multilight panel is a sandwich lightweight panel, composed of Okoumè multilayer or birch or poplar skins, with high physical and mechanical performance and compressed cork core, at high or medium density, to ensure a good acoustic and heat insulation at a low specific weight. It is ideal for commercial and residential realizations, open spaces or for nautical use.

The glue used in the assembly process of the materials is of our own invention, certified, solvent-free, with no VOC

emissions, therefore also ideal for nautical use.

Depending on the required thickness, it is also possible to equip the panel with approved raceways for the passage of cables and/or pipes.

The thickness of the components may vary depending on the needs of designers.

The standard size of the panel is of 250 x 122 cm.
